

Greetings,

I would like to tell you a little about Emergency Medical Systems in the state of Montana. The Emergency Medical System in Montana is a mixture of Fire based, Hospital based, and Stand-alone services that are staffed by a mixture of volunteer and full time/part time staff. Representing these individuals is the Montana EMS Association. Our mission is to represent these services in the state government and provide training opportunities for those who need them. While larger services are able to afford supplying training there are smaller services, such as those in most of eastern Montana, who have to work within a smaller budget and most EMS personnel often use private funds to acquire their training.

I am contacting you today to inquire if your company would be willing to donate to the Montana EMS Association so that we may fulfil our mission to train our fellow Emergency Medical Personnel. Our 6-member staff volunteers 100% of their time to supporting this organization which means all donations go entirely to the training mission. Our expenses include bringing in guest speakers, contracting with hotels to provide conference rooms, acquire training supplies, and locating individuals who provide hands on training to EMS personnel, as well as offset the cost of hotel rooms for EMS personnel to reduce the financial burden.

Your donation will ensure that EMS personnel are able to respond proficiently and professionally when activated by the 911 system. We will acknowledge your gift in both the agenda as well as verbally during the opening and closing announcements.

If you would like further information, please feel free to contact us.

Best Regards,

Clint Loss
